

Thank you VERY MUCH for helping us in the study of nursing. Below are statements that pertain to your comfort right now. Six numbers are provided for each question; please circle the number you think most closely matches your feeling. Relate these questions to your comfort at the moment you are answering the questions. It will be important for your study to have the nurses all answer the questionnaire at the same time relative to their conversations with patients. Have you decided when this should be? Right before the conversation, right after, an hour later? An hour before? Etc.

	Strongly Disagree			Strongly Agree		
	1	2	3	4	5	6
1. It is easy for me to talk about advance directives with my patients.....
